

MONISH P N

Bengaluru, India | +91 9513779292 | pnmonish187@gmail.com | linkedin.com/in/monish-pn

PROFESSIONAL SUMMARY

Software Development Engineer with production experience building **Go microservices, REST APIs, concurrent Redis workflows, cloud integrations, and database-backed services**. Proven across automated testing, CI/CD releases, observability, incident response, security-domain platforms, and applied AI/ML, with measurable improvements in reliability, performance, and cloud cost visibility.

TECHNICAL SKILLS

Languages & Backend: Go, GoFr, Python, Java, C, SQL, REST APIs, OpenAPI/Swagger, microservices, asynchronous processing, concurrency

Data & Quality: MySQL, MongoDB, Redis, schema design, indexing, pagination, query optimization, TDD, unit testing, mocks, integration testing

Cloud & Delivery: AWS, Azure, GCP exposure, Docker, Kubernetes working knowledge, GitHub Actions, CI/CD, Git, Linux

Reliability & AI: Grafana, Prometheus, OpenObserve, CloudWatch, monitoring, alerting, incident investigation, T5, Transformers, Hugging Face, Claude, Cursor, GitHub Copilot, Codex

PROFESSIONAL EXPERIENCE

Software Development Engineer — ZopDev

Bengaluru, India | Jun 2025 – Apr 2026

- Built the platform's first end-to-end **Go notification microservice**, integrating Slack, email, Google Chat, and Microsoft Teams through REST APIs for an estimated **25,000 monthly notifications**.
- Designed **Redis-backed asynchronous workers** with throttling, rate limiting, and a delayed retry to improve delivery reliability and protect downstream integrations.
- Engineered a **restart-resilient concurrent workflow** for **100+ resource groups**, preserving ordered execution within groups while five workers processed multiple groups concurrently.
- Designed CRUD APIs and collaborated on **MySQL schemas and indexing**; removed N+1-style queries using batched retrieval and added pagination to reduce database load and improve response performance.
- Practiced **test-driven development** and wrote unit tests with mocks across Go microservices, achieving approximately **70–90% coverage** depending on the service; added integration tests for critical API flows.
- Built **Grafana and Prometheus monitoring** and integrated OpenObserve structured logging; investigated or resolved approximately **30+ production issues** and **10+ customer-reported problems** using logs, metrics, and root-cause analysis.
- Monitoring and alerting improvements were associated with an approximately **30% reduction in automatically generated incident tickets**, improving the signal available for operational response.
- Built an **AWS RDS cost-attribution system** using CloudWatch, AWS SDK, and database-utilization data, helping identify unused databases and contributing to an approximately **70% month-over-month infrastructure-cost reduction**.
- Executed **weekly production releases** through GitHub Actions, validated Kubernetes rollouts and post-release health, and collaborated on IAM permissions and authorization middleware for secure cloud-resource access.

Security Software Developer Intern — Data Security Council of India / CID Karnataka

Remote | May 2024 – Jul 2024

- Evaluated and integrated 37 public OSINT APIs and worked with an authorized 4 TB breach-intelligence repository using Python, Django, and MongoDB under security and access-control requirements.
- Contributed to an internal OSINT platform and Telegram bot while engaging with approximately 10+ Karnataka CID stakeholders to understand investigative workflows and operational needs.

PROJECTS

- Fine-tuned and evaluated a **T5 transformer model** with Python, Transformers, and Hugging Face for Text-to-SQL; published the work as a **CRC Press / Taylor & Francis** book chapter.
- Developed **Price Easy** using Python, MongoDB, and web scraping to collect and compare current product prices across multiple e-commerce platforms.

EDUCATION

B.Tech in Computer Science Engineering — BNM Institute of Technology | Bengaluru, India | Jan 2022 – May 2025 | GPA: 9.20/10.0

Relevant Coursework: Data Structures, Database Management, Software Development, Cloud Computing, Networking, and Machine Learning

ACHIEVEMENTS & PUBLICATION

- Winner, **CIDECODE Hackathon 2024**, a national-level 24-hour OSINT challenge; the win led to the DSCI/CID Karnataka internship and an Appreciation Certificate from the Superintendent of Police.
- Completed the **PwC Launchpad Program** covering Java, RDBMS, and Agile software-development methodologies.
